

Cybercrime & Online Fraud Can Happen to Anyone

FraudSupport.org is here to help.

WHAT IS CYBERCRIME?

Cybercrime is any activity that uses the internet to access, transmit, or manipulate data for illegal purposes. This includes the fraudulent representation of oneself for financial gain, personal gain, or with malicious intent.

EVERY 2 SECONDS
someone in the United States
becomes a victim of cybercrime.

\$2.71 BILLION
of financial losses were
reported to the FBI/IC3 in 2018.

351,936
victims reported an incident
to the FBI/IC3 in 2018.

Report. Recover. Reinforce. Giving Victims of Cybercrime a Voice

As a public-private nonprofit, Cybercrime Support Network (CSN) built FraudSupport.org as the first nationwide initiative developed specifically to help cybercrime and online fraud victims through a process of "report, recover and reinforce" after an incident occurs.

At FraudSupport.org, CSN provides guidance on where to call and how to reach the appropriate resource to report the crime, recover from and reinforce their own cybersecurity.
